

Covid-19 - Blog

Introduction:- Corona Virus which is commonly called Covid-19 is infectious disease. It causes illness in the respiratory system of human. It is a new virus that is impacting the whole world badly as it is spreading through contact from person to person.

Spread of Covid-19:- Covid-19 was firstly identified in December 2019 in Wuhan city of China. In March 2020 WHO declared the Covid-19 outbreak a pandemic. Now it has spread throughout the world.

The virus spreads by the droplets generated from the cough or sneeze of an infected person.

Symptoms:- Covid-19 symptoms can be very mild to severe. Some people have no symptoms. The most common symptoms are fever, dry cough and breathing problem. Besides these symptoms like fatigue, sore throat, muscle pain and loss of taste or smell can also be seen in the patients of Covid-19.

Prevention of Covid-19:- As we know no proper drug or vaccine has been developed for its treatment.

of this disease yet prevention is the only cure of it. There are some that we can do

- ① cover your nose and mouth with mask
- ② wash hands regularly with Soap or Sanitizer
- ③ maintain a distance of at least 5-6 feet.
- ④ Avoid touching your eyes nose and mouth
- ⑤ Take such things which boost your immunity system.

Impact of covid-19 :- The government declared lockdown to break the chain of covid-19. People had to face a lot of troubles due to it. The labourers who earn and eat daily were out of food. They don't have any work because all the economical, social and educational activities were closed for a long time. It has affected our education badly. People lost their jobs etc.

Conclusion :- coronavirus is one of the most severe issues that are being faced by the people around the world. It is necessary that we come out of this situation as soon

as possible

Together we all can bring an end
to this ~~part~~ pandemic.
